COMPLETE TURNKEY SOLUTIONS

For our turnkey projects, we follow a structured process with emphasis on quality and consistency. The first stage is initial design, where we visualise a design concept that incorporates client design choices. This is done through a fully rendered 3D model for client approval.

Once signed off by the client, our team processes the approval of the project with relevant government and corporate offices, including the municipal office, the office of Civil Defence, and other business authorities.

We also handle the acquisition of supplies and equipment according to specified project timelines, ensuring that design implementation starts on time, as per agreed standards. Every project is assigned a dedicated project manager to supervise the execution of the project and ensure that the highest quality standards are observed all throughout.

Upon project completion, Maranello will facilitate a complete handover as well as a scheduled client follow-up query to make sure that the results are up to par.
